

Bancomer helps you to eliminate time between selling and collecting

## Supplier Financing (Crediprovedores)

### What is it?

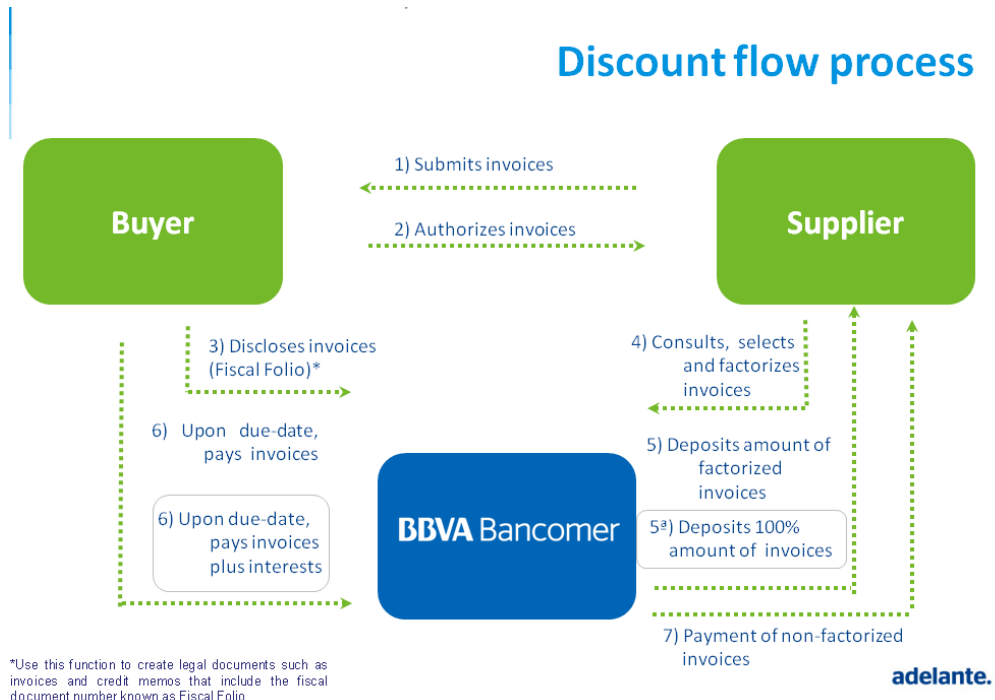

Crediprovedores is a product whereby you, as great buyer, offer your suppliers a development option via the financing of their accounts receivable at preferential rates without undertaking debts.

Such product also helps you simplify your payment system, as we offer the option to pay all your accounts payable when due, provided they have not been paid in advance to the supplier, even via deposits to accounts from other banks.

### How does it work?

It is quite simple! The grand buyer creates an account payable for a supplier, arising from the purchase of a good or service, which is sent to Bancomer through some electronic tool (Bancomer.com or Net Cash). The supplier, also using an electronic tool, makes the relevant discount from its accounts receivable, confirmed by the great buyer.

Also, if the grand buyer so requires, we have a payment disbursement service, which consists of depositing, on your name and stead and to those suppliers that have not made use of the discount, the face value of your account receivable on the document's due date.
